What kind of transmission fluid does a 2001 honda civic take

CC0/wonderingtareen/Pixabay For well over a decade, the Honda Civic has been one of the bestselling vehicles, particularly with people ages 35 and under. However, you don't have to fall within that age range to appreciate its many great features. Most experts consider it a good investment, because it's stylish, comfortable, reliable, safe, fuel-efficient and it performs well. As of 2016, it's in its tenth generation, and it just gets better with age. If you're considering purchasing a Honda Civic, you need to know about these five great features:1. The Roomy InteriorOne of the first features you'll hear Honda Civic owners and experts alike mention is just how spacious the car's interior is, especially for a compact vehicle. And that roominess extends from the front seat all the way to the cargo space. The tenth generation of the Civic saw passengers receive over three more cubic feet of extra space, something that is unparalleled in this particular class of vehicles. While some compact vehicles have a cramped back seats, the Civic doesn't, and it also offers plenty of head room. Best of all is the 15.1 cubic feet of cargo space. The Civic was already known for having plenty of space in its trunk, but the tenth generation made it even roomier which means you can fit your luggage, strollers, groceries and whatever else you need.2. The Entertainment SystemThese days, the entertainment system in a car is just as important as its other features, and the tenth generation Honda Civic doesn't disappoint. Smartphone integration is seamless with options for both Android Auto and Apple CarPlay. It also comes with SiriusXM satellite radio. Previous generations of the Civic didn't have either. Aside from the base LX model, the car comes with a touchscreen display, and all versions come with Bluetooth and audio connections with steering wheel controls. Depending on the model, you can get a 160-watt, 180-watt or 450-watt sound system. The 450-watt option even has navigation integrated into the system.3. The Safety FeaturesIf you're looking for a car that's safe — and who isn't? — you can't go wrong with the Honda Civic. The National Highway Traffic Safety Administration awarded it the organization's top safety rating, and the Insurance Institute for Highway Safety claims the car beat every single one of its collision tests. Even the most basic model of the Civic comes with advanced safety gear, including sensors for adaptive cruise control, lane and road-leaving detection, automatic brakes and collision detection. The car even has a camera on passenger side mirror that shows you when it's safe to switch lanes when you use your blinker.4. The EngineDepending on the model and style of Civic you buy, you have several engine options available to you, but no matter which one you select, you can count on it being powerful. The standard sedan engine generates up to 158 hp and 138 lb-ft of torque. The turbocharged engine on the Civic can generate up to 174 hp and up to 177 lb-ft of torque. Because of these powerful little turbo engines, the car has more get-up-and-go than many other cars its size. You don't have to worry much about lagging when you're taking off at stop lights or trying to make a quick turn into busy traffic. Combine that with out agile and easy-to-drive the tenth generation Honda Civic is, and you'll find it quite a pleasure to take out on the road.5. The Gas MileageA car's gas mileage may not be one of its sexiest features, but it's definitely something you'll want to know about unless you have money to waste. And since you probably don't, you'll be happy to know that fuel efficiency is one of the the Honda Civic's most beloved features. Thanks to the new design that was introduced in 2016, the Civic now gets 31 miles per gallon in the city and 42 on the highway if you opt for an automatic transmission. This makes it a great car for anyone who commutes long distances to school or work each day, as well as anyone who likes to stick to a budget. MORE FROM QUESTIONSANSWERED.NET Hemera Technologies/PhotoObjects.net/Getty Images Your Honda Pilot's automatic transmission fluid should be changed every 30,000 miles. The transmission fluid keeps the internal gears and seals inside of the transmission lubricated and cool. The transmission fluid is pumped out of the transmission pan and circulates throughout the transmission. After about 30,000 miles, the automatic transmission fluid begins to break down and should be replaced. Drive the Honda Pilot for 10-15 minutes to heat up the transmission fluid. Park it in a safe and cool work area and open the hood. Jack up the front of the vehicle and place jack stands on both sides under the designated jacking points. Lower the jack so that the Pilot comes to a secure rest on the stands. Leave the jack under the Pilot in the upright position. Locate the transmission fluid drain plug. This is on the lower driver side of the transmission. The drain plug has a big bolt head with a square hole in the center. Position the fluid catch pan under the drain plug. Insert the square end of the 3/8 inch drive ratchet in the drain plug. Turn the drain plug counterclockwise to remove it. Pull the drain plug out and allow all of the transmission fluid to drain out. Put the plug back in and tighten it with the ratchet. Crawl out from under the Pilot and to the front of the engine. Raise the hood and secure it in place. Locate the transmission dipstick on the driver side of the engine. The transmission dipstick has a yellow handle. Pull the dipstick out of the tube and set it to the side. Slide the 1/4-inch plastic tubing onto the long neck of the funnel. Slide the tubing inside of the dipstick hole. Slowly pour in all four quarts of automatic transmission fluid through the funnel. Remove the funnel and the tubing from the dipstick tube. Reinsert the dipstick. Crank the engine and let it run for about two minutes. Turn off the engine and wait two minutes. Check the transmission fluid. The fluid level should be on the full mark. Close the hood. Jack the front of the Honda Pilot back up and remove the jack stands. Lower the Pilot back to the ground. Idemitsu Type H automatic transmission fluid, 1 quart (part number 10116042) Designed for and meets the requirements of the Honda Z1 automatic transmission. What kind of gear oil does a 2000 Honda Civic use? Honda Civic 2000 automatic transmission. ATF type H Plus automatic transmission oil, 1 liter Idemitsu®. Designed and meets the requirements of Honda automatic transmissions with DW1 and Z1 specifications. What kind of gear oil does a 2001 Honda Civic use? 2001 Honda Civic recommends using stock Honda ATFZ1 transmission fluid (automatic transmission fluid) or DEXRON III ATF transmission fluid. The transmission oil capacity of the 2001 Civic is 5.9 liters. So you may also be wondering, how much gear oil does a Honda Civic need? Depending on whether you have an automatic or manual transmission, the amount of oil in the transmission is 2.9 liters for the first fill for the automatic transmission and 3.2 liters for the manual transmission. Do I need gear oil for Honda? The simple answer is yes. Corrosion is omnipresent and Honda fluids are the best fluids to minimize corrosion and keep your Honda reliable. Different car manufacturers use different metal alloys and rubber compounds in their vehicle components. What is the difference between ATF z1 and ATF DW 1? DW1 can be used in older gearboxes. I would suggest that if you still have Z1 Liquid you can use it (since Z1 Liquid has been discontinued). DW1 can be used in older gearboxes. I would suggest that if you still have Z1 Liquid you can use it (since Z1 Liquid has been discontinued). What kind of transmission fluid does a 2002 Honda Civic use? Idemitsu H-Type Automatic Transmission Fluid, 1 Quart (P / N 10116042) Designed to meet the automatic transmission requirements of the Honda Z1 specification. What kind of gear oil does a 2004 Honda Civic use? 2004 Honda Civic 1.3L / 1.7L, ATF Type H, 1 liter automatic transmission fluid by Idemitsu®. How much does Honda manual transmission fluid weigh? Manual transmission oil, recommended weight is 5W 20 synthetic motor oil. I saw them not asking for MTF fluid specs but saying they can only use Honda Should I wash or change transmission fluid? How often should I change the transmission oil on my Honda? What is the year of production, engine and gearbox? Honda's first CVT was advised to change fluids every 15,000 miles. Later versions can go up to 60,000 when used with the improved fluid. The first manual transmissions that used engine oil such as MTF had to be replaced smoothly every 30,000 miles. How often should you change the oil in a Honda Civic? Conventional oil change. 10,000 miles. 90,000 million. Coolant (wash / replace) 60,000 miles. Turn the tires. 10,000 miles. Air filter (replaced) 30,000 km. Brake fluid (wash / replace) 45,000 miles. Cabin air filter (replaced) 30,000 miles. Fluid automatic transmission (gearbox) 60,000 miles. How much gear oil do I need for my car? Most automobiles carry 12 to 16 gallons of gear oil, but the vehicle model determines the type and quantity. While many cars have a ■■■■■■■■ to check the gear oil, other models do not. How do I know when the gear oil needs to be changed? If you hear a squeak or squeak, move as quickly as possible and check the oil or oil level with the engine running. The color of the liquid should also be taken into account. If it's anything other than bright red, the gear oil may need to be replaced. How do you know the transmission is bad? How many liters of gear oil do I need for a Honda Accord v6? The 2008 Honda Accord 2.4L engine requires 2.5 liters of gear oil. 2008 Honda Accord V6 models require 3.3 liters of gear oil. How much does it cost to change gear oil? The cost of replacing the fluid from a dealer, service center, or independent mechanic ranges from \$ 80 to \$ 250. The average cost is about \$ 100 for both automatic and manual transmissions. It is recommended to replace the filter and clean the container every time the fluid is changed. How often should you replace the spark plugs on your Honda CRV? Spark plugs How much transmission oil does a Honda Civic use? Depending on whether you have an automatic or manual transmission, the amount of oil in the transmission is 2.9 liters for the first fill for the automatic transmission and 3.2 liters for the manual transmission. What kind of gear oil does a 2010 Honda Civic use? How much antifreeze is there in a 2001 Honda Civic? The 2001 Civic's coolant capacity for the 2001 automatic transmission is 4.9 liters. The cooling oil capacity of the 2001 Civic for the 2001 manual transmission is 5.32 liters. How much antifreeze is there in a 2005 Honda Civic?
